PRODUCT OVERVIEW

Secure Your Cloud Environment

Modern businesses run on SaaS. The Comprehensive SaaS Security Suite protects every layer of your cloud stack.

Email Security — DT Email Security

Banner Warnings

Real-time email banners alert employees to suspicious, impersonated, or dangerous messages.

ML Threat Detection

Machine learning identifies novel phishing patterns that bypass traditional filters.

One-Click Reporting

Employees report suspicious messages with one click — feeds threat intelligence.

Spear Phishing Defense

Detects display name spoofing and executive impersonation attacks.

Dark Web Monitoring — DT Dark Web Monitoring

Credential Surveillance

Monitors the dark web for your domains, emails, and passwords 24/7.

Real-Time Alerts

Immediate notification when compromised credentials are detected.

Guided Remediation

Step-by-step employee response guide delivered with each alert.

Executive Dashboard

Summary view of all detected exposures with risk severity scoring.

TRAIN & GOVERN

Harden the Human Layer. Govern Every Identity.

Phishing Simulation — DT Security Awareness Training

Automated Campaigns

Regularly scheduled phishing simulation campaigns with templated scenarios.

Employee Scoring

Individual and department-level click rates tracked over time.

Training Integration

Failed clickers automatically enrolled in targeted security awareness training.

Compliance Reporting

Training completion and test results satisfy regulatory awareness requirements.

Identity & Access Governance

MFA Enforcement

Multi-factor authentication policy management across Microsoft 365.

Conditional Access

Location, device, and risk-based access policies configured and monitored.

Privileged Account Review

Regular admin and privileged account audit to remove unnecessary access.

Access Reporting

User access reports support compliance reviews and access certifications.

MICROSOFT 365 IS YOUR BIGGEST ATTACK SURFACE

Over 80% of data breaches involve compromised credentials. The SaaS Security Suite monitors, trains, and alerts across every Microsoft 365 attack vector — email, identity, and dark web — in one integrated program.

THE SUITE AT A GLANCE

One Integrated SaaS Security Program

Four protection layers, deployed and managed by Degarmo Technologies across your Microsoft 365 environment.

Layer	What It Protects	How
DT Email Security	Inbound email & employees	✓ Warning banners, ML detection, one-click reporting
DT Dark Web Monitoring	Credentials & domains	✓ 24/7 surveillance, real-time alerts, guided remediation
DT Security Awareness Training	The human layer	✓ Phishing simulations, auto-enrollment, scoring
Identity & Access Governance	Microsoft 365 identities	✓ MFA, conditional access, privileged account review
